Our manufacturing program

max. length/width 1'500 mm
max. diameter 320 mm

Our rollers and cylinders find ready application in:

- Data, transmission and printing technologies
- Copying, photo, laser and medical technologies
- Office machine and computer industries
- Apparatus engineering and construction
- Machines, prototype and apparatus construction
- Electronics, banking and automation industries
- Serving the general manufacturing industry worldwide as well as large and small international OEM companies

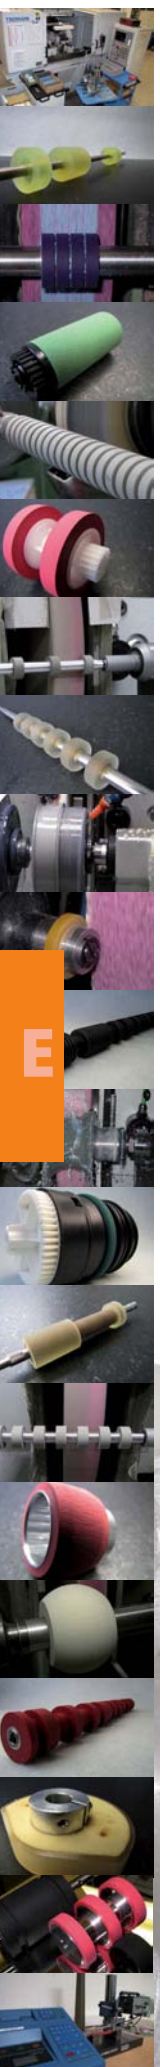

Important information for engineers, technicians and customers

In order to identify your precise requirements, please provide us with the following information:

- Purpose and application of the rollers and cylinders
- Medium which will be transported
- Mechanical load (pressure, velocity etc.)
- Chemical conditions (temperature range, humidity, climate conditions, fluid contact, hardness etc.)

Please consider the DIN standards for rubber, silicone, foam and synthetic (polyurethane) rollers or cylinders.

Custom production only; we do not produce stock items. Utilizing your custom drawings, mock-ups and other representations we produce the exact product that you need for your application.

Our strengths

«ALWAYS ON THE MOVE THROUGH RIGOROUS RESEARCH AND DEVELOPMENT»

- **Flexibility**
Our huge inventory of raw stock material allows us to produce fast-turnaround individual prototype construction and speedy delivery
- **Frame contracts**
Economically attractive solutions delivered in custom quantities can be completed in optimal time frames
- **Just-in-Time / Kanban**
Ordered today – delivered tomorrow! With our custom article storage and planning program
- **Personal consulting on location**
We invite you to take advantage of our know-how so that conception-to-production and final delivery go without a hitch
- **Highest quality standards**
Our certified quality management, the latest CNC technology, more than 60 years of experience as a family business and CMK, CPK, SPC quality control assures our customers the highest quality with finished product accuracy within 0.005 mm

«CHALLENGE DRIVES OUR BUSINESS»

Ask us, we are happy to help!

Our cleaning program

6-1508/W1/H/soft

Rubber rollers and cylinders cleaner

6-1730/LIXTON 510

Antistatic solution

6-1825/LIXTOP-TYP

Special antistatic plastic cleaner

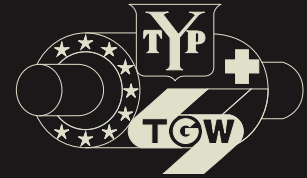

6-1850/TELE-WASH

Antistatic screen cleaner
